

I just want you to know that XM radio is the best thing to listen to out there. It has such variety that i am always able to find something to listen to. The weather and traffic channels are the best when going into a big city. I dont have to search for a channel that MIGHT report the weather or traffic. I can get it right away on XM. I pay for the service just like i pay for cable TV. The service offers things that cant be had anywhere else. If i dont like the amount or service i can cancel. Unlike normal radio, your stuck listening to trash or nothing, you get what you pay for when its FREE. I hope the FCC in all its wisdom rejects the NAB'S petition 04-160.
